ABOUT US

Versa Bath Fittings is a well-reputed company known for selling top-notch bathroom fitting products, including faucets, showers, floor drains, and allied products. Versa was established in the year 2006 with the aim of providing supreme quality bath products to people around the globe at affordable prices. To date, Versa has delivered standard, classy, and modern products to more than 10,000 customers across the world while ensuring optimal customer satisfaction. Not only this, we have always listened to their demands, customizations, and needs, and have delivered the best bath fittings based on our customers' requirements.

Our Mission

Our mission is to deliver top-notch, stylish, and long-lasting bathroom utilities to our customers while ensuring compliance with the market's specified standards & policies.

Our Vision

Our vision is to become a global supplier of bathroom accessories and fittings with optimal quality and innovation. Not only this, the purpose is to deliver top-notch bathroom-fittings without burning a hole in one's pocket while keeping in mind our customers' needs since we believe in 'Loyalty is Royalty'

MANUFACTURING PROCESS

Manufacturing Process Consists Of Casting,
Mechanical Processing Which Includes Machining, Grinding
And Polishing, Electroplating, Assembling, Water Testing, Packaging.
We employ best technology in field of bathroom fittings manufacturing.

- The warranty is applicable from the date of purchase.
- The customer must produce the VAT/GST paid invoice/warranty card in original to avail warranty service. In case the purchase has been done by the developer of the apartment, the possession letter from the developer will be treated as equivalent to bill.

In case of any manufacturing defect in the product Versa shall repair or replace the product of equivalent value. Damage of any product or parts thereof due to any of the following causes will not be covered under this warranty. User's or its agent's misuse, negligence, faulty installation or accident. Improper maintenance of the product by not abiding by the versa printed instructions manual / customer guidelines. Dirt, lime scale or aggressive cleaning chemicals. Unauthorized alternation of the products. This warranty will not be valid for the products or parts thereof that don't use original Versa spare parts and which have been repaired by unauthorized unqualified person. This warranty specially excludes hoses, rubber components and other consumables. In case of the any amendment made to the certificate, this warranty, this warranty is non transferable and invalid. Versa shall not be liable for incidental, consequential, exemplary special or punitive damages, or for any loss of revenue, profit or use arising out of a breach of this warranty or in connection with the sale, maintenance, use, operation or repair of any product, in no event will Versa be liable for any amount greater than the purchase price of the defective good. The customer will have to bear the risk and cost of returning the product that is bound to be defective during the specified warranty period to versa bath fitting.

Consumer Guidelines

To ensure uninterrupted pressure of water , it is advisable to keep the pipeline straight with minimum number of bends which will support smooth flow of water . All the supply lines must have vent pipes these vent pipes help in removing air looking in the water supply to give a smooth flow of water from the fittings . Use 25mm pipelines rather than 20mm which will help in overcoming scaling inside the pipelines and will allow sufficient space for the water to flow . Prior to plastering of fixing tiles , test the working of all the installed concealed fittings on a high pressure to check for leakage if any . Clean the aerators provided in the items at regular intervals for a perfect foam flow of water from the fittings Place the outlet point in the overhead tank at least 25mm above the ground level of the tank . this provides the flow of foreign particles sand etc. Along with water supply into the fittings and thereby prevents the possible damages to the working parts , clean the tank thoroughly before the supply starts , it is suggested that the overhead tank must be cleaned at regular intervals to avoid inflow of foreign particles . clean the fittings regularly with normal soap or chalk powder to remove scaling or stains do not use detergent as this may cause damage to the chrome finish used on all Versa products . Do not use harsh cleaning agents containing abrasives and acids instead use a soft sponge or wet cloth to with soapy water or diluted vinegar to protect the color coated finish . To protect fine finishing of fittings from dirt, stains and other damages during construction cover them with cloth or poly bag after their installation till they come into actual use . It is suggested that center to center distance for hot and cold inlet for all types of wall mounted mixtures should be maintained at 165mm where any of wall mixtures from different ranges can be easily installed without any problem. Buy Versa products from company's authorised dealers only to ensure genuine quality material. Insist on genuine spares from company's local services center or its authorised stockist in case of any repair or replacement . Please strictly follow the instructions manual provided for individual items in their packing boxes for their correct installation and maintenance. For any type of technical or services assistance , please contact the nearest area representative area dealer .
